

## Real-Storage Partners with JMR Electronics

**Ft Myers, FL - January 15, 2005**

Real-storage, a developer and provider of network storage solutions, today announced that it has partnered with JMR Electronics, a premier supplier of storage systems.

This partnership will allow Real-storage the opportunity to offer some of the most advanced storage solutions available on the market today. JMR's product line includes Serial ATA based solutions utilizing an internal Hub architecture that makes their A4 unit one of the fastest performing SATA raid systems available today. This unit is ideal for secondary storage, Disk-to-disk backup and ILM applications.

"We are excited to partner with Real-storage and feel their expertise in storage solutions added to our expansive product line up will allow them to provide only the very best in storage solutions to their customer base", says Tom Fabrizio, Vice President of JMR Electronics. "Real-storage is a leader and the quality standards they set will benefit customers looking for real solutions to their storage needs."

"We are very pleased to round off our storage solution offerings with JMR's line of Forta Fibre and Serial ATA storage systems", said Anthony L Centore II, President of Real-Storage. Our customer base will now have the fullest selection of storage solutions options to choose from including fibre-fibre and fibre-SATA JBOD and RAID disk subsystems.

Real-storage will also offer JMR's newest technology both in iSCSI blade storage for easy on line storage capacity expansion across the network, as well as the new PSAN storage solutions that offer massive storage capacity, high availability and the lowest price per terabyte seen on the market today.

### **About JMR Electronics**

JMR is a premier supplier of storage systems, shipping hundreds of units weekly, worldwide. JMR is the only ISO 9000-2003 registered vertically integrated manufacturer of storage products and has been in business for over 24 years. With 20+ patents filed, JMR continues to create innovative technologies in Blade Storage, SATA, Fibre Channel, SCSI, and the new PSAN storage systems.

### **About Real Storage**

Real-Storage is a cutting edge developer, integrator, and manufacturer of intelligent network and storage solutions. Our mission is to provide innovative solutions designed for storage-intensive environments that require ease of use, dependability, and uninterrupted access to mission-critical information.
